Delhi NCR, India | +91-9560171340 | prsjn23@gmail.com | <https://parasjain.pro> | [linkedin.com/in/iparasjain](https://www.linkedin.com/in/iparasjain) | github.com/prsjn

PROFESSIONAL SUMMARY

Senior Software Engineer with **5 years** in Java, Spring Boot, Angular, and LLM services. Reduced cart API latency from 1.5s to 180ms by tuning JPA queries and adding Redis caching. Built Kafka async pipelines (800k+ req/day) and AI catalog checks using vector search. Strong in SQL tuning, Elasticsearch, and production debugging.

TECHNICAL SKILLS

Languages & Frameworks: Java (Multithreading, Streams, JVM), Python, TypeScript, JavaScript, SQL, Spring Boot, Spring Cloud, Hibernate, JPA
Frontend & UI: Angular, React, RxJS, Angular Material, HTML5, CSS3/SCSS, RESTful APIs
Databases & AI: MySQL, PostgreSQL, MongoDB (Vector Search), Elasticsearch, Redis, LLM Integration, Vector Embeddings
Messaging, Cloud & DevOps: Apache Kafka, RabbitMQ, AWS (EC2, S3, RDS), Docker, CI/CD (Jenkins), Git, Linux, Prometheus, Grafana

WORK EXPERIENCE

Moglix **Noida, India**

Senior Software Engineer April 2024 – Present

- Cut cart API latency from **1.5s to 180ms** by optimizing JPA queries and adding **Redis caching**, which also reduced database load by **~35%**.
- Engineered a promotion rule engine supporting 15+ discount types, with **Kafka-driven** cache invalidation across distributed nodes.
- Architected Moglix Wallet, a payment service handling **3,000+ daily transactions** through the **PayU** gateway, with idempotent request handling and automated reconciliation.
- Automated Google Merchant feed syncing for **50,000+ SKUs** hourly using **Elasticsearch**.
- Built an automated catalog validation service using **LLMs** and **MongoDB vector search** to detect hazardous items across **50,000+ SKUs**, using thread pools for sub-second checks.
- Developed a Next Day Delivery (NDD) eligibility engine that evaluates **8,000+ SKUs across 200+ pincodes** in under 50ms.
- Configured **Prometheus and Grafana** alerts for API error rates and latency spikes, and added **Resilience4j** circuit breakers with fallbacks to prevent cascading microservice failures.

CarDekho (GirnarSoft Group) **Jaipur, India**

Software Engineer March 2022 – March 2024

- Implemented 4 **Spring Boot** microservices for vehicle inventory discovery, serving **800,000+ API requests per day** at **99.5%+ uptime**.
- Set up and tuned an **Elasticsearch** cluster for vehicle search across **100K+ listings**, cutting query response time from **2.1s to 300ms (85% faster)**.
- Led development of a full-stack inventory management app in Angular and Spring Boot, adopted by **50+ enterprise dealerships**.
- Integrated **RBAC authorization** with **Spring Security** and JWT token rotation. Improved **Jenkins** pipeline stability to **90%+** by adding automated **JUnit** test suites.

Greatwits Pvt. Ltd **Delhi NCR, India**

Software Engineer October 2021 – March 2022

- Designed and developed REST APIs in Spring Boot and admin dashboards in **Angular** for banking and CRM clients.
- Modernized legacy modules and added unit tests, raising test coverage to 80%.

EDUCATION

Master of Computer Applications (MCA) **Graduated: 2021**

Indira Gandhi National Open University (IGNOU) Delhi NCR, India

- **Focus:** Data Structures & Algorithms (DSA), Distributed Systems, Cloud Computing, Database Management Systems (DBMS), and Software Engineering.
